## DECLARATION REGARDING “CALIFORNIA PROPOSITION 65”

### 1. Reference Regulation

The **Safe Drinking Water and Toxic Enforcement Act**, introduced in California in 1986—commonly known as **CA Proposition 65**—requires businesses to provide clear and reasonable warnings about significant exposure to chemicals found in drinking water, the environment, and consumer products that may cause cancer, birth defects, or other reproductive harm. Under this legislation, the **California Office of Environmental Health Hazard Assessment (OEHHA)** has published a list of chemicals identified by the State as carcinogenic and/or toxic to reproduction. This list, known as the **Proposition 65 List**, updated as of December 29, 2023, is accessible at:  
<https://oehha.ca.gov/proposition-65/proposition-65-list>.

### 2. Raw Material and Production Process Assessment

The steel we use in the production of our items contains **Nickel** and **Chromium** as alloying elements. As alloy constituents, none of these substances are present in free form. Therefore, no warning is required under the regulation for the special steels used in the production of our items.
